

Floor Plan Suggestions

Avoid table placement in close proximity of the DJ area. The guests directly in front of the speaker cabinets WILL be annoyed by the music. If possible, follow our suggested floor plan.

* We can accommodate almost any situation, these layouts are to be used as a guide only.

**Due to space constraints, it may be necessary to place tables on the dance floor during dinner.*

We suggest you seat the younger guests at these tables, as they will need to be moved prior to any dancing.

- *The Dance floor must be in close proximity to the DJ*
- Avoid floor plans where the dance floor is in another room, on another floor, or not visible to your guests.*
- *Having the 'Bar' in the same room as the music, will also help in guest retention later in the evening.*
- *Choose a venue that will accommodate all of your needs in ONE location.*
